

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. THE
COINS OF THE TURKS

IN THE
BRITISH MUSEUM.

CLASS XXVI.

BY
STANLEY LANE-POOLE.

EDITED BY
REGINALD STUART POOLE,
CORRESPONDENT OF THE INSTITUTE OF FRANCE.

LONDON :
PRINTED BY ORDER OF THE TRUSTEES.
1883.

EDITOR'S PREFACE.

THE Eighth Volume of the Catalogue of Oriental Coins in the British Museum comprises the coinage of the 'Othmánlee Sultáns of Turkey, together with that of the Kará-Kuyunli and Ák-Kuyunli, and the minor dynasties that succeeded to the Seljookee empire in Asia Minor. Fraehn's Class XXVI. corresponds to the greater part of the contents of this volume.

The large extent of the series of 'Othmánlee coins rendered some method of compression desirable, and the brevity of their inscriptions fortunately permitting an arrangement in double columns, the descriptions of the obverse and reverse are placed side by side. The length of the inscriptions of most Mohammadan coins precluded this method of printing in previous volumes of the Catalogue.

The metal of each specimen is stated, and its size in inches and tenths, in the same manner as in preceding volumes. The weight of typical examples in gold and silver is stated in English grains. Tables for converting grains into grammes, and inches into millimètres as well as into the measures of Mionnet's scale, are given at the end of the volume.

Typical specimens are figured in the twelve plates, which are executed by the autotype mechanical process from casts in plaster.

The work has been written by Mr. Stanley Lane-Poole; and I have carefully revised it, comparing every coin with the corresponding description.

Since the publication of the last volume, the Académie des Inscriptions et Belles-Lettres of the Institute of France has conferred upon this work, as represented by the Fifth Volume, the honour of *couronnement*, by awarding to it the biennial Prix Duchalais.

REGINALD STUART POOLE.

INTRODUCTION.

THE present volume is mainly occupied by the description of the coinage of the 'Othmánlee Sultáns, to which that of the Ameers of Asia Minor forms a necessary introduction. The latter consists of twenty-five coins of various dynasties which sprang up on the ruins of the Seljookee empire of Er-Room, and governed the greater part of Asia Minor until they were in turn themselves succeeded by the 'Othmánlee Turks. Only three varieties of these rare coins have hitherto been published, but these three have had the advantage of the minute and detailed annotations of Dr. E. von Bergmann* and Prof. J. Karabacek.† These two papers form almost the sole authorities for the explanation of similar issues. The inscriptions, indeed, are generally quite clear and legible, but the names when read are not easily to be identified in history. Von Hammer treats of the annals of Asia Minor from the fall of the Seljookees to the conquest by the 'Othmánlees with far too little detail; and the Turkish annalists, upon whom his industrious work is founded, are both vague and contradictory. In these circumstances the identification of the eleven princes whose coins are found in the British Museum was a matter requiring some research; and the construction of full dynastic lists, with the dates of accession and decease, was still more difficult of accomplishment. The princes and dynasties in question were sufficiently numerous and long-lived to allow ample room for omission and confusion.

* Beiträge zur muham. Münzkunde: Sitzungsberichte der phil.-hist. Classe der K. Akademie der Wissenschaften, vol. lxxiii. p. 129 ff.

† Gigliato des jonischen Turkomanen Fürsten Omar-beg: Numismatische Zeitschrift, vol. ii. pp. 524-538, and vol. ix. pp. 207-214.

Between the years 700 and 877 of the Hijreh ten separate dynasties, comprising nearly fifty princes, arose in Asia Minor, fought together, and annexed each other's towns, were subjugated by the 'Othmánlees and restored to independence by Timur, and finally were reconquered and annexed by the former. Of the dates and even the names of many of these princes the historians furnish mutually contradictory accounts, and sometimes there is a long interval without a single item of information. These contradictions and other difficulties have been discussed in a paper contributed by me to the Journal of the Royal Asiatic Society (vol. xiv., 1882), which may be consulted for details. It is only necessary here to summarize the results which were there set forth.

On the breaking-up of the Seljookee empire of Er-Room, ten separate dynasties divided its territories among themselves. The *Karásee* dynasty sprang up in Mysia; the lines of *Şároo-Khán* and *Aydeen* in Lydia; of *Menteshá* in Caria; of *Tekkeh* in Lycia and Pamphylia; of *Hameed* in Pisidia and Isauria; of *Karamán* in Lycaonia; of *Kermiyán* in Phrygia; of 'Othmán in Phrygia Epictetus; and of *Kızil-Ahmedlee* in Paphlagonia.

All these dynasties were gradually absorbed by the rising power of the 'Othmánlees, once the least among them. The first dynasty to succumb was that of *Karásee*, which was annexed in A.H. 737. Next, *Hameed* was purchased on the occasion of a marriage alliance in 783; and in 792 Báyezeed (Bajazet) I. annexed *Kermiyán*, *Tekkeh*, *Şároo-Khan*, *Aydeen*, and *Menteshá* in a single campaign, and finished his work in 794 and 795 by the conquest of *Karamán* and *Kızil-Ahmedlee*. Thus, at the end of the eighth century of the Flight, not a hundred years after the assumption of independence by 'Othmán I., the arms of his great-grandson had swept away the nine rival dynasties. After the battle of Angora, however, late in 804, where Báyezeed was defeated and taken prisoner

by Timur, and for the moment the power of the 'Othmánlees in Asia was almost annihilated by the Tatar horde, seven of these dynasties (but not Karásee or Hameed) were restored by Timur, and enjoyed a renewed vitality for some twenty-five years; but in 829-32 five of them were re-absorbed by Murád (Amurath) II., and in 877 the 'Othmánlee rule, in the hands of Moḥammad II., the conqueror of Constantinople, was supreme over all the provinces which once owned the sway of the Ten Ameers.

The opposite table, which has been compiled from the sources already mentioned, as well as from the Sharaf-Námeḥ, Sa'd-ed-deen, and other authorities, gives a synchronous view of the ten dynasties and the princes who composed them. Those dates which are underlined are confirmed by the authority of Sa'd-ed-deen, whose highly-esteemed history Mr. E. J. W. Gibb has kindly consulted for me. These and the other dates generally rest upon several authorities; but certain divergences are recorded in the article already referred to. The most important are 740 or 746 for the accession of Ilyás of Šároo-Khán; 749 or 759 for that of 'Eesá of Aydeen; the insertion of an 'Alee in the Karamán list, 815—824, for which there is no satisfactory evidence; and 873 or 877 for the submission of Pir Aḥmad and Ishák of the same dynasty. Among the coins, all of which are inedited, the following must be signalized as specially important: no. 53, of Ibráheem of Karamán, establishing his accession in 829 (not 830, as Sa'd-ed-deen and the Sharaf Námeḥ, nor 826, as Bergmann), and presenting a remarkable obverse inscription; no. 58, of Ishák of Šároo-Khán, with date 776, proving that Rasmussen's date 791 for Ishák's accession is incorrect; no. 59, of 'O[mar] ibn Ilyás of the same dynasty, as being the only evidence with which I am acquainted, besides Von Hammer's mention of an "Umurbeg" in 810 (vol. i. p. 348), that such a prince belonged to the line at all; no. 60, a most valuable coin of Juneyd, proving that this

adventurer did not retain the outward marks of vassalage imposed upon him in 814 or 816 by Sultán Moḥammad I., whose name does not appear on the coin; and no. 62, which presents the name of a certain Leyth ibn Ilyás of Menteshá, 824, totally ignored by the historians, who give Uweys and Aḥmad as successors of Ilyás in 824, and state that they were imprisoned in 829 in consequence of having fled from the "favours of the heaven-supported monarch," the 'Othmánlee Sultán, at whose court they had been compelled to reside. Perhaps their brother Leyth, whom this coin reveals to us, was regent and viceroy in their absence. The coins of Moḥammad Arteen, of Ishák (Páshá? governor of Anatolia under Murád II. and Moḥammad II.), and Mufettiḥ-ed-deen, an elsewhere unrecorded vassal of the house of Karamán, are also important additions to the numismatics of the period.

The coinage of the 'Othmanlee Sultáns presents very few difficulties. The inscriptions are short, and consist of little beyond the name and style of the Sultán and the mint and date. At first a simple religious formula was employed, but this soon dropped out of use. The coins of Urkhán (the first Sultán who exercised the right of coining) have not even the mint or date inscribed upon them, but only the *Kelimeh* on one side and the Sultán's name, with generally no title, but sometimes with السلطان الاعظم, on the other. One specimen of his successor, Murád I., bears the date 790 in ciphers, and after this all 'Othmánlee coins are dated, but always in ciphers.* The earliest occurrence of a mint in the British Museum collection is on a coin of Moḥammad I. struck at Brusa in 822. The inscriptions soon assume a monotonous character, consisting merely in the name of the Sultán and his father, as محمد بن مراد خان

* From the time of Bayezed II., however, the majority give only the date of each Sultán's accession, until Mustafa III., 1171, when the practice of adding the year of the reign was introduced.

(sometimes with سلطان prefixed), followed by the benedictory formula خلد الله ملكه or more commonly خلد ملكه, which about the time of Seleem II. gives place universally to عز نصره. Sometimes both formulas occur on the same coin, and in one case we read خلد ملكه ودوته; on another عز نصره وايدده. On the large pieces of the New Coinage دام ملكه is used instead of the preceding; and on one type we find دام ملكه وسلطنته الى اخر الدوران. The simplicity of the Sultán's titles is seldom varied. Suleymán Chelebee calls himself امير once; Moḥammad I. once خاغان. Bayezed II. introduces the formula ضارب النصر صاحب العزو النصر "Striker of the glittering [gold] and lord of might and victory by land and sea," which in the reign of Murád III. is replaced by سلطان البرين و خاقان البحرين سلطان, "Sultán of the two continents and Khakán of the two seas, Sultán, son of the Sultán." Seleem II. affects the title شاه, and the same is used by his son Suleymán the Magnificent, who also adopts the style of بادشاه غازى on some curious gold pieces struck in the Hijáz (for Mekkeh and El-Medeeneh,—الحرمين الشريف [ين]). Mahmood II. introduces the only other important variation by employing (besides غازى) the form سلطان سلاطين زمان عدلى محمود.

The Tughrá, or monogram of the Sultán's name and titles, appears for the first time in an elementary form on coins of Suleymán Chelebee. It was said to have originated from the impression of Sultán Murád I.'s hand dipped in ink, (which was all the handwriting the Sultán was capable of,) and has always been the official signature of the Porte. It consists generally of the formula of Sultán X. son of Sultán X. Khán, and sometimes includes the word صبا, written small, within the curves of the monogram, which Fraehn doubtfully interprets دايماً. The various forms of the Tughrá may be seen in the Plates at the end of this volume. It does not become frequent on the coins until the reign of Moḥammad III. (1003 A.H.).

A certain interest attaches to the mints of 'Othmánlee

coins as affording indisputable evidence of the growth of the Ottoman empire, and also as throwing some light on its provincial divisions. The following list of the mints of each Sultán, as represented in the National Collection, may be compared with the very instructive table of the gradual increase of the Turkish empire which Mr. E. J. W. Gibb has kindly drawn up expressly for this work, and for which his study of the original Turkish authorities has proved especially valuable.

* Islámból ("Islam Plenteous") is merely a fancy name for Constantinople. When coins are struck with each name it is noticeable that as a rule Islámból occurs on the gold and Constantinople on the silver coinage. The theory that Islámból was used, instead of Kus-tanṭeeneeyeh, to indicate that the Şulṭan did not inherit by direct Ottoman succession, finds no support in the coins themselves.

There is but one serious difficulty connected with 'Othmánlee coins, and that is their metrology. The coinage of other Mohammadan dynasties is of a more or less simple character; deenárs and dirhems, with very occasional and elementary subdivisions and multiples, have comprised the denominations of all gold and silver issues; and the fluctuating and anomalous copper coinage which accompanied them has defied metrological analysis. Even if the standards and purity of the earlier Mohammadan issues presented a more important field of metrological inquiry, the data appear to be almost wholly wanting. The weights and purity of deenárs and dirhems were constantly changing, at the bidding no doubt of the financial exigencies of the particular State or sovereign; but in the vast majority of instances the records as to these changes and their causes have not been found. In preparing the Catalogue of Oriental Coins in the British Museum, therefore, it has not been necessary and rarely possible, hitherto, to enter with any reasonable prospect of commensurate results into the vexed questions of Mohammadan metrology. With the 'Othmánlee coinage, however, the case is different. Here we have some data to go upon. The commercial relations between Turkey and other European powers made some sort of approximation to European systems of currency necessary, and also called forth from time to time official tariffs of exchange between Turkish and other coinages. These documents not only deal with the exchange value and the mutual relations of the various 'Othmánlee coins, but often give their weights and certain rough descriptions of their appearance and distinctive marks. No description of the modern Turkish coinage would be complete without the name by which each coin is distinguished in Turkey, and this denomination is, as a rule, only to be determined by the weight of the coin.

The early Turkish coinage, indeed, presents little variety of denominations. The *akçeh* (اِقْچَه) or 'Othmánlee, a small

silver coin, averaging eighteen grains in weight, was the only piece issued by Urkhán, son of 'Othmán I., when, acting on the counsel of 'Alá-ed-deen, he inaugurated the Ottoman coinage in 729. The weight was one-third of a dirhem of silver, and the *titre* ninety per cent. of pure metal :* some authorities, however, give the *aķcheh* as one-fourth of the dirhem.† The *mānghir* (مانغر), a copper coin, was introduced by the next Sultán, Murád I. :—it was of uncertain value, and ranged apparently at first from eight to sixteen to the *aķcheh*, and eventually became of equal value with it.‡ After the conquest of Constantinople, Moḥammad II. for the first time issued (in 883)§ the gold coin called *altoon* (التون), or more generally by numismatists *sequin*. Previously foreign gold coins, especially the Venetian ducat, had sufficed for the Turkish currency, counter-stamped, however, according to M. Belin, with “*ṣaḥḥ*, *contrôle*,” in a square. The *altoon*, or *sultānee altoon*, was known by various other names, according to the predominant foreign commercial influence :—under western influence it was called *flooree* (florin); under Persian, *sháḥee*; and after the conquest of Egypt, the name *ashrafee* or *skereefee*, which had been given to the improved coinage of El-Ashraf Barsabay, was transferred to the issues of the Constantinopolitan mint. Thus far, beyond a good deal of deterioration and fluctuation in the weight of the *aķcheh*,|| there is little to

* So Col. Aḥmad Jevád Bey, in his *T'a-reekh-i-'askaree-i-'Othmánnee*, vol. i.

† *Tāj-et-Teedreekh*, and Von Hammer.

‡ Jevád Bey states that 800 were coined out of the *ukkah* of copper (400 drachms), and that at first two and then three of these went to the *aķcheh*.

§ The first Turkish gold coin in the British Museum is not of Moḥammad II., but of his successor Báyezsed II., and bears the date 886 A. H. (1481 A. D.)

|| M. Belin's pages (*Journal Asiatique*, 6th ser., t. iv.) are full of records of a constantly increasing deterioration of the *aķcheh*. *E.g.* Seleem I.—3 *aķchehs* weighed 1 drachm of silver and 60 went to the *sequin*; Seleem II.—*aķchehs* smaller; Moḥammad III.—*aķchehs* still smaller and thinner; Aḥmad I., still diminishing; 'Othmán II.—*aķcheh* thinner than paper.

remark about the 'Othmánlee coinage. Down to the time of Aḥmad III., the gold coins are all simply *altoons* (qualified according to the fancy of the time with various epithets, as sháhee, ashrafee, shereefee, tughralee, jedeed, &c.); the silver coins, except certain heavy pieces of Syria and Mesopotamia,* are *aḳchehs* or 'Othmánées; and the copper, *máughirs*.

In the twelfth century of the Hijreh a new coinage begins. Two standards of gold are issued side by side, and an entirely new system of silver currency is introduced. The two metals must be discussed separately.

The change in the gold currency consisted in the introduction of a second standard. At first the altoons had weighed about 53 grains, sometimes rather more, and often a few grains less. Under Aḥmad III., however, in 1123, a different gold coin, weighing 40 grains, or about three-fourths of the old altoon, was struck. It has been suggested† that this new coin was originally an altoon of the Egyptian mint and of the old weight, and that it gradually deteriorated until it came down to 40 grains, when it was introduced into Constantinople, doubtless with a view to that financing for which the Turkish mint was famous. There

The silver coinage in the British Museum bears out this statement; beginning at from 17·4 to 19·1 gra. under Urkhán, the *aḳchehs* maintain nearly the same weight until Moḥammad II., when they fall to 14·8, and even 13·0 gra.; under Báyezeed II. they are reduced to 12·3, and under Seleem I. to 10·0; Suleymán I. issued *aḳchehs* at an average weight of 10·0 gra., one falling so low as 7·6; Seleem II. reduced them to 9·5; and under Moḥammad II. and Aḥmad I. the weights fall to 5·0 and 4·0; and under Murád IV. and Ibráheem I., and Moḥammad IV., 7, 5, and 9 gra. are ordinary weights.

* These seem almost anomalous. The silver issues of Suleymán I., e.g. at Ámid, weigh 61·5 gra., Soor 40·5, Damascus 14·7; Seleem II., Aleppo 52, Baghdád 59·3; Murád III., Aleppo 55, Ámid 48·7; Moḥammad III., Aleppo 34, Ámid 33; Aḥmad I., Erzeroom 24, Aleppo 20; Mustafa I., Erzeroom 34; Ibráheem I., Ámid, 17; Damascus, 22; Moḥammad IV., Damascus 19, Aleppo 39, Baghdád 45. The silver issues of the Barbary States are also peculiar in weight; 20, 15, 8, and 46 occurring within the period from Suleymán I. to Moḥammad IV., besides more normal weights.

† By M. Bernard in the *Description de l'Égypte* (2nd ed., t. xvi.).

is, however, no evidence either of this Egyptian origin or of this gradual deterioration. We should expect to find Egyptian pieces of 50, 48, 44 grains, and so forth, gradually approximating to the eventual 40 grains. Such, however, we do not find. The new standard of 40 grains comes suddenly into existence, *first in Constantinople* in 1123, and then in Egypt in 1143, with no previous gradations of weight.

This sudden introduction of a perfectly new standard weight is a matter of no great surprise in the history of Turkish money, and, indeed, taken in connection with the almost contemporaneous change in the silver issues, appears natural. M. Bernard has confused the separate questions of the origin of the *type* and the origin of the *standard*. The type of the new coin is older than its standard. It must be observed that 'Othmánlee coins are distinguished by certain regular and constant formulas, or their entire absence. (A.) The old altoon has on its obverse the formula, *Ḍárib en-naḍr ṣáhib el-'izz wa-en-naṣr fi-l-barr wa-l-baḥr*, "Striker of the glittering (money) and lord of might and victory by land and sea." (B.) A new formula, *Sulṭán el-barreyn wa-Khaḳán el-baḥreyn sultán ibn es-sultán*, "Sultan of the two lands and khakán of the two seas, sultán son of the sultán," was first substituted for formula A on the Egyptian coinage in 982 (under Murád III.), and retained its place there undisputed until 1143, when coins without any formula shared its monopoly. This second formula, *Sulṭán el-barreyn*, gradually ousted *Ḍárib en-naḍr* from most of the Turkish mints; it was in possession of the coinage of Aleppo in 1002, of Ámid 1013, of Algiers 1032, Tunis 1049, and Constantinople 1058. The difference of formula, however, so far has nothing to do with the weight. A and B alike weigh about 53 grains. (C.) In the reign of Aḥmad III., which began in 1115, the 3rd type of gold coin was introduced: this had no formula, but the Ṭughrá or monogram of the sultán on the obv., and

it was of the regular weight of 53 grains.* This new *Tughrá*-coin received the name of *funduk altoonee* (فندق التونى). Simultaneously the coins with Formula B were issued with the new standard of 40 grains, and received the name (said to have originated in Egypt) of *zer mahboob*, which they bore to the time of 'Abd-el-Mejeed. Thus we have (1) from 883 to 982 only Formula A, weight 53 grains; (2) from 982 to 1115 (or a little later) Formulas A and B side by side, the latter gradually monopolising almost the whole coinage, both of weight 53 grains; (3) from 1115 to 1260, a new *Tughrá*-impressed coin with no formula, of the old 53 weight, distinguished by the name *funduk altoonee*; and the already-known Formula B coin, now reduced to a new standard of 40 grains, and called *zer mahboob*. M. Bernard was quite right in saying that Formula B originated in Egypt; but the name *zer mahboob*, which is identified with Formula B *and the weight of 40 grains*, was probably not given to the coin before the new weight was invented, and that invention took place at Constantinople, not Cairo. The weights 53 and 40 remained almost unchanged down to 1203, when the weight of the mahboob was reduced.

There are half funduks of 26 and 27 grains from the time of Aḥmad III. in the National Collection, and a half zer mahboob of 20 grains from the same period. An early quarter sequin zer mahboob is mentioned by Bernard; but so far as I am aware the quarters are always of the funduk standard, of about 13 grains, until the reign of Mahmood II., when z.m. quarters are introduced, the subdivisions undergoing variations corresponding to the changes in the units. These variations may be thus tabulated:—

* Jevád Bey says it was of the weight of one dirhem and five grains [of barley], and of 28 standard.

GOLD COINAGE OF MAḤMOOD II.

Year of Reign.	Zer Mahboob.	$\frac{1}{2}$ Z. M.	$\frac{1}{4}$ Z. M.	Double (or Maḥmood- eeyeh).	$\frac{1}{2}$ F.
1—9	37 $\frac{1}{2}$ gra.
1—18	13
9—15	37
9—20	..	17	..	70	..
15—26	24	14, 12	} 8—5
21—26	27	13			
26—32	24	12			

It will be noticed that a double mahboob is inserted in the preceding table. Multiples of the sequin, whether funduklee or mahboob, existed from the beginning of the double coinage. The British Museum has examples of Maḥmood I., weighing 75, 67, and 80 grains, and of 'Othmán III., 77, 81, 82 grains; Muṣṭafá III., 71, 74, 75, 80 grains; 'Abd-El-Ḥameed I., 79 and 80 grains; Seleem III. (when the z.m. had fallen to 37) 65; and Maḥmood II., 70 grains. These are all double mahboobs, and their weight is not very different from that of the old mithkál, i.e., 7 $\frac{1}{2}$ grains or 4.6332 grammes. (M. Sauvaire estimates the Egyptian mithkál at 4.6347; but the old Mekkeh mithkál, preserved by the Muwahhids, at 4.7292.) It is remarkable that the double sequins, though twice the *mahboob* weight, are of the *funduklee* type, with Tughrá on obv. They may, however, equally well be described as 1 $\frac{1}{2}$ funduklee. It is to them, no doubt, that Jevád Bey refers under the name of "Maḥmoodeeyehs," which he states were struck in the reign of Maḥmood I. with the weight of 1 $\frac{1}{2}$ dirhem and the *titre* 23: he adds there were half Maḥmoodeeyehs also; the latter I should call sequins zer mahboob. Besides these, there is a piece of Maḥmood I., weighing 117 grains, which is apparently a triple-sequin z.m.; and another of 244 grains which may be a six-sequin piece. Muṣṭafa III. issued a gold coin of 150 grains, which may be a quadruple sequin. There is also an ornamental piece of Aḥmad III.,

with a rim, and a weight of 440 grains, which was not probably intended to pass current.

The silver coinage is a more complicated matter than the gold. In the latter the statements of the historians are fairly borne out by the actual coins; but in the silver this is not so often the case. In trying to solve some of the difficulties involved in the changes of the silver coinage, I have made use of the excellent *Essais sur l'histoire économique de la Turquie*, contributed by M. Belin to the *Journal Asiatique*,* Bonneville's *Traité*, and Bernard's admirable dissertation on the Turkish coinage of Egypt in the *Description de l'Egypte*.† Dr. E. Dickson, moreover, of the British Embassy, Constantinople, has been so good as to ransack whatever records were to be found at the Turkish capital, and to gather all the information that various learned Turks and Armenians were able to supply on the subject, notably some valuable tables drawn up by M. Hortolan. The results, though most interesting, are disproportionate to Dr. Dickson's great zeal and long-continued researches. It appears, indeed, that the Turks themselves know very little of the history of their own coinage; documents do not seem to exist; and, in fact, coining in Turkey has always been conducted in a haphazard, inaccurate way: a certain number of coins had to be issued at a given time, and only a certain quantity of bullion was in the Treasury for the purpose; accordingly the amount of gold and alloy, and the weight of the coin, were arranged so as to suit the exigencies of the situation. The result is that we cannot expect any consistent or methodical system of moneying.

The main authority upon which to depend is after all the coinage itself. The twelve hundred 'Othmánlee coins in

* Sixth series, t. iii., pp. 416—489; iv., 270—296, 301—390, 477—530; v. 127—167.

† T. xvi. of the second edition.

the British Museum offer a large induction, and upon them my conclusions must be principally founded. When the written authorities and the coins are at variance, there can be no doubt that the coinage is the safer guide. As, however, until the last twenty years the coins themselves bore no indication of their denominations, and the ghuroosh with its subdivisions and multiples, and the intermediate pieces, were distinguishable only by their weight, the coinage may not always be a clear and satisfactory guide. When, for example, we know there were pieces of 5, 10, 15, 20, 30, 40, 60, 80, and 100 paras, and the series is not completely represented in the collection, but only pieces of say 225, 306, and 445 grains, it may be doubtful whether the three are respectively 20, 30, and 40 para pieces, or 30, 40, and 60 para pieces, especially since M. Belin's economic history records sudden and extensive alterations in weights. The coins, therefore, require to be used with caution in an examination of this kind, and great allowance has to be made for the extraordinary carelessness and inaccuracy of the mint officials, whereby phenomenal exceptions to ordinary rules may occur, and also for friction, which has reduced many Turkish coins considerably in weight. Nor must it be forgotten that an edict fixing the weight of a certain coin at so much was not by any means sure to be put literally into practice.

M. Belin distinguishes between the national and the commercial monetary system of Turkey. The former consisted of the altoons, akchehs, and mánghirs, which make the course of the metrologist tolerably smooth down to the end of the eleventh century of the Flight.* The com-

* A ten-akcheh piece is stated by M. Belin to have been introduced by 'Othmán II. in 1028, and to have been called 'Othmánée, after the Sultán. This is confirmed by the appearance of a silver coin of 44 grains weight in the national Collection in this very reign. Similar coins of about 40 grains continued to be issued down to the time of the institution of the new coinage.

mercial system, on the other hand, is the silver currency introduced after that date to meet the exigencies of commerce with European nations. A large number of foreign coins have always assisted the Turkish currency. At one time, when the *akcheh* was the only silver coin issued at Turkish mints, foreign dollars and grossi served the purposes of the higher denominations of a silver currency. But under Suleymán II., in 1099, the Porte began to issue large silver coins in imitation of its neighbours. The Austrian thaler, and Dutch rixdaler (which the Turks called *asadi ghuroosh*), were the chief large silver coins current in the Ottoman empire, and it was in imitation of these that Suleymán II. issued his own large silver pieces in 1099, and gave them the name of *ghuroosh* (غروش), which recalls the grossi, groschen, and groat of the Western States. The Dutch dollar weighed $8\frac{1}{2}$ drachms or dirhems,* and the German 9; but the new Turkish ghuroosh was fixed at 6 drachms,† or less than 300 English grains, at the highest estimate of the dirhem. Without entering deeply into the question of the exchange value of this Turkish ghuroosh, or piastre, as it was called by travellers—not, however, to be confounded

* M. Belin gives the dirhem or "drame" as $\frac{1}{3}$ of the mithkál, which he estimates at 4.618 grammes. The dirhem, at this rate, would be 3.079 grammes, or say $47\frac{1}{2}$ English grains. The Dutch crown would thus weigh 403 grains. There happens to be a Dutch crown counter-struck with Mustafa II.'s inscriptions, only a few years later than Suleymán II., but this weighs 415 grains. M. Belin's "drame" is nearly that of the French Expedition to Egypt, 3.0884. M. H. Sauvaire informs me that Mohammed 'Alee appointed a commission to investigate the question, and the dirhem was then fixed at 3.0898, and this is held to be the weight of the legal dirhem by Mahmood Bey. Tillet, in his *Essai sur la rapport des poids étrangers avec la marc de France* (Académie des sciences, 1767), gives for the dirhem of Constantinople figures corresponding to 3.18899. M. Sauvaire deduces 3.151596 from Edh-Dhahabee's tables. The *Annuaire Ottoman* (1280—1285) gives 3.207. If the weight of the Dutch crown may be depended upon, $\frac{1}{3}$ of it would give 3.168764 for the dirhem. Amid this confusion in the elementary and fundamental matters, it is not easy to arrive at very certain results. M. Sauvaire in his letter adds: "Vraiment, avec cette métrologie musulmane, il y a de quoi perdre la tête!"

† Jevád Bey agrees in this.

with the small modern piastre—it is interesting to notice that the ghuroosh and the akcheh, which was its lowest *divisionnaire*, were constantly altering their relations. At first 50 (Jevád Bey says, originally 40) akchehs went to the ghuroosh, then 40—sometimes even 80, and in 1138, as many as 120 akchehs went to the new Turkish unit. This last figure, however, is perhaps explained by the fact that another small silver coin, the para (پاره), had come into existence about the middle of the eleventh century of the Hijreh (before 1066 = A.D. 1655), and that the para eventually usurped the place of the akcheh. How many paras went to the ghuroosh originally we do not know; but we do know that at first 4 akchehs went to the para, and supposing that about 80 akchehs at that time made up the ghuroosh, the latter must have equalled 20 paras. Then, as para and akcheh deteriorated—as we find they did in almost every page of M. Belin's instructive *Précis historico-économique* (ch. v.)—the para came to be, what it continued to be down to the time of 'Abd-el-Mejeed, the 40th of the ghuroosh, and the akcheh became the 3rd of the para and the 120th of the ghuroosh. Jevád Bey states that about 150 years ago the ghuroosh was officially adopted as a financial standard with the value of 40 paras.

Between the ghuroosh and the para were a series of subdivisions: the *besklik* (بشلك), or 5 para piece; *onlik*, 10 para; *onbesklik*, 15 para; *yigirmlik* (or more correctly *yigirmilik*), 20 para; *zolota* (زولوته)* or *otuzlik*, 30 para; the ghuroosh itself being 40 para. Beyond the ghuroosh were the *altmishlik*, or *double zolota*, 60 para; the *ikilik* (ايكليك), or *double ghuroosh*, 80 para; and the *yuzlik* (يوزلك), 100 para;

* Jevád Bey says the zolota was struck in the year 1110 with the weight of 7 drachms and the value of 90 akchehs; standard and weight were gradually lowered until in the reign of Mahmood II. the exchange fell to 85 paras, when the coin was abolished. "Zolota," says Dr. Dickson, "is a Slav word meaning three-fourths of a unit."

but the last three were not so regularly coined, to judge from the collections, as the lower denominations.

How are we to distinguish between these various denominations? Or, since there is only the weight to guide us, what were the weights of these various denominations at various periods?

In order to deal with this question, the first essential is to collect all the data that can be gathered from the sources enumerated above. The following table exhibits the principal weights of 'Othmánlee silver coins.*

* The weight is expressed in English grains, and has often had to be reduced from M. Belin's grammes, and since M. Belin has himself reduced the grammes from the Turkish weights, it is possible some error may have crept in, especially as Turkish weights were not always fixed quantities. I have left out fractions; the Turkish mints were so lax in their adjustments, that a whole grain wrong here and there was of no importance. The names of the Sultáns, from the introduction of the new coinage under Suleymán II., are given on the left margin; the presumed denominations of the coins are inscribed at the top, and the weights appertaining to them are placed in the corresponding column beneath; the initials preceding each weight represent:—A = Belin; B = British Museum Collection; C = Bonneville; D = M. Hortolan; E = M. Bernard, in the *Description de l'Égypte*. The para is made the unit for convenience of numbering. All the coins were struck at Constantinople, except the few marked E.

¹ This ought probably to be referred to Seleem III. ; but it is just possible that the Yigírmílik may have fallen to 97 in the preceding reign.
² Probably a mistake for "old and new ghurooah."
³ This must be a solota, though D calls it a ghurooah.
⁴ D calls this an Itlík, by mistake.

Accepting M. Belin's statement that the first ghuroosh, that of Suleymán II., weighed 6 drachms, or say 300 grains, the British Museum coins correspond very well for the first three reigns: ghuroosh, 294, zolota, 223, under Suleymán II.; ghuroosh, 300, yigirmilik, 146, under Aḥmad II.; and ghuroosh, 300 or 310, yigirmilik, 150 or 155, and perhaps onbeshlik, 94, under Muṣṭafa II. But the first really conclusive series is that of Aḥmad III., of whom the B.M. collection has pieces of 2—4, 10, 52, 100, 150, 204, 300, and 415 grains, which may undoubtedly be labelled akcheh (3), para (10), beshlik (50), onlik (100), onbeshlik (150), yigirmilik (200), zolota (300), and ghuroosh (400). Here the difficulty arises: why was the ghuroosh suddenly raised from 300 to 400 grains? Or are the previous coins of 294, 300 and 310 grains zolotas, and not ghuroosh at all? In the face of M. Belin's definite statement as to the weight of the first ghuroosh, and considering the absence of any heavier coin than those of about 300 grains, we may dismiss the latter question. How the coin came suddenly to be raised from 300 to 400 may perhaps be explained by the fact that the British Museum possesses two dollars counter-struck with the inscriptions of Muṣṭafa II., the one an Imperial dollar, weighing 300 grains, the other a Dutch dollar, weighing 415 grains. I believe the explanation of the change in the weight of the ghuroosh is simply that the Dutch dollar was taken as the model, in the place of the Imperial dollar. It was precisely at the same period that the 40 grain zer mahboob gold piece was first issued side by side with the 53 grain funduklee. It may be observed that the proportion between the mahbúb (40) and the funduklee ($53\frac{1}{3}$) is precisely the same as that between the Imperial (300) and the Dutch (400) dollar, or the zolota (30) and the ghuroosh (40). I believe, therefore, that just when the lower mahbúb standard was added to the gold currency, the lower (Imperial dollar) standard was classed as a zolota, and the higher (Dutch dollar) standard introduced for the ghuroosh. Against this

view, however, which is based upon the coins themselves must be set the statement of M. Belin, based upon histories and official documents, that under Aḥmad III., in 1131, new zolotas were issued at 8 drachms 1 dānik (or 390 grains): the old zolotas being at the same period stated to weigh $\frac{1}{18}$ th of 98 drachms (or 290 grains). It will be noticed that these figures, 290 and 390 grains, correspond pretty accurately with the 293 and 389 of the British Museum specimens; but I am not disposed therefore to allow that these specimens are accordingly an old zolota and a new zolota respectively. If the old zolota weighed nearly 300 grains, the British Museum does not possess a ghuroosh until Aḥmad III.'s time—which, considering the richness of the collection, is improbable; and further, on this theory, M. Belin's other statement that the original ghuroosh weighed 285 grains is incorrect. The simple explanation, I think, is to regard M. Belin's "old and new zolotas" as errors for "old and new ghuroosh," which at once brings this statement into accord with the rest of the data.

Accepting, then, the hypothesis that in the reign of Aḥmad III. the ghuroosh was raised from 300 to 400 grains, just as two gold coins in the same proportion were at the same time issued, it must be seen how the theory works in subsequent reigns. Under Maḥmūd I. we find the following scale:—Akcheh 3 grains, para 10, beshlik 49, onlik 97, yigirmilik 186, zolota 289, ghuroosh 371, which are all in very fairly accurate proportion, but all a little reduced, the ghuroosh apparently falling gradually to 362 grains. Under 'Othmān III. the same proportions are preserved, but the weights continue to fall, and under Muṣṭafa III., half a century after the increased standard in silver was introduced, the ghuroosh has returned to its old weight of 300 grains, and even less, and the scale becomes 3, 8, 37, 70, 103, 148, 228, 306, and a very similar scale is maintained during the reign of 'Abd-el-Ḥameed I. A fresh reduction took place under Seleem III. (1203); the para

fell to 5, and the ghuroosh to 200 (or 190), and the beshlik, onlik, and yighirmilik were proportionately reduced to 5, 26, 52, and 95, and this remained true for Mustafa IV.

The silver coinage of Mahmood II. comprises several different standards, and very varying degrees of purity. The coinage may be divided into two series, the first comprising the *beshtik*, or 5 piastre piece, the *yuzlik* (100 paras), or $2\frac{1}{2}$ piastre piece, the *piastre* (40 paras), *yigirmi-paralik* (20 paras), *on-paralik* (10 paras), *besht-paralik* (5 paras), and *para*; whilst the second consists of the *altilik*, or 6 piastre piece, the *utchlik*, or 3 piastre piece, the *altmishlik* (60 paras), or *double solota*, equal to a piastre and a half. It will be noticed that the names of the coins have undergone an alteration, like their relations and weights. The original *beshtik* of 1225 (1810) had a weight of 410 grains, or, as Belin remarks, the same as the weight of the old *ikilik*. The *yuzlik* of the same period was of 190 grains, the piastre or ghuroosh 96 grains, and so on. Several different varieties of this or a nearly similar standard were issued, and then in 1245 (1829) a new *beshtik* of about 250 grains, with *yuzlik* at 117 grains, piastre at 50 grains, *yigirmi-paralik* at 24 grains, &c. At the same time the *altilik* was coined with the weight of 190 grains, or only four-fifths of the *beshtik*, though it was nominally worth 6 piastres to the latter's 5. The *utchlik* (3 piastres) was issued at 93, or a little less than twice the piastre, and the *altmishlik*, or 60 para piece, at 41 grains, or less than the piastre of 40 paras. The explanation of this apparent inconsistency is found in the fact that while the *altilik* series contained about 80 per cent. of silver, the *beshtik* series contained barely 50 per cent. In the present day, the surviving examples of these coins are exchanged at 5 piastres for the *altilik* and only $2\frac{1}{2}$ piastres for the *beshtik*. These details, and the classification of the new (1829) issue, I owe to Dr. Dickson, who has also supplied missing links in the series contained in the National Collection by pre-

sending examples collected by himself in Constantinople. The following extract from Baron de Testa's *Récueil des Traités de la Porte Ottomane* completes the foregoing account of Mahmood II.'s varying coinage :—

Bechlik de 1810. [A.H. 1225 ; year of reign 8.]

Valeur intrinsèque : en piastres Médjidié, 18 piastres et 8 paras, tandis qu'elle aurait dû être de 26½ piastres.

Poids égal à l'ancien ikilik (pièce de 2 piastres).

(Note.)—Belin, l. l., n'indique point la valeur émise de ce bechlik (dit djihadic, monnaie de guerre), et nous n'avons pu nous procurer nous-même, à ce sujet, que des renseignements vagues et n'ayant aucun caractère officiel.

Bechlik de 1829. [A.H. 1245 ; year of reign 28.]

Titre : 0,220 à 0,225 millièmes.

Valeur intrinsèque : 180 para argent, 1 para cuivre ; surélévation, 69.

Valeur émise : 74,750,000 piastres.

Bechlik de 1832. [A.H. 1248 ; year of reign 26.]

itre : 0,170 à 0,175 millièmes.

Valeur intrinsèque : 101 para argent ; 2 para cuivre ; surélévation, 97.

Valeur émise : 128,725,000 piastres.

Altılık de 1833—1839. [A.H. 1249—54 ; year of reign 27—32.]

Titre : 0,435 à 0,440 millièmes.

Valeur intrinsèque : 205½ para argent ; 1 para cuivre ; surélévation, 33½.

Valeur émise ; 117,970,160 piastres.

From the time of Mustafa III. (1171—87) those large silver pieces, multiples of the zolota and ghuroosh, which always nominally existed in the reformed Turkish coinage, but I suspect were seldom coined in any large numbers, begin to appear in the British Museum cabinet. The most ordinary examples are the *altmishlik*, or double zolota, of 60 paras, equal to a ghuroosh and a half ; and the *ikilik* or double ghuroosh. The weights of these, according to the authorities, and also according to the coins which I believe to correspond to these denominations, are given in the table, and offer little difficulty. The *yuzlik*, or 100-para piece, only occurs, in the British Museum, in the coinage of Seleem III., and I am inclined to believe that

the weight given by Bonneville for the same piece under 'Abd-el-Hameed I. is a mistake.

Under 'Abd-El-Mejeed, on the 11th Moharram 1260 (Febr. 1844), an entirely new coinage, called the Mejeeddeeyeh currency, imitated from European models, was issued. It consisted of the following pieces :—

5 GOLD.

	Value in Piastres.	Names.	Weight. Grammes.	Grains.	Diameter. Inch.	Title.
1.	20	Silver Mejeeddeeyeh	24.055	375 ?	1.5	$\frac{880}{1000}$
2.	10	Onlik (or Yarem Mejeeddeeyeh)	12.027	185	1.0	..
3.	5	Cheirek	6.018	98	.95	..
4.	2	Ikilik	2.405	38	.75	..
5.	1	Ghuroosh	1.202	19	.6	..
6.	¼ (20 para)	Yigirmi-paralik	0.601	9½	.5	..

5 COPPER.

Of 40, 20, 10, 5, and 1 para, called respectively the Ghuroosh-paralik, Yigirmi-paralik, On-paralik, Besh-paralik, and para.

The *tolerance* in gold was $\frac{2}{1000}$ above and below. The intrinsic value of the 100 piastre piece, or lira, was 6.614 pure gold, and 0.602 copper; and the value of the first issue was 1,202,397,600 piastres.

* Or Dubloon.

† Or Turkish pound.

The *tolerance* in silver was $\frac{8}{1000}$ above and below. The intrinsic value of the 20 piastre piece, or Mejeedeeyeh (Medjidieh) was 19·945 silver and 4·110 copper: value of issue, 414,371,775 piastres.

The 40 and 20 para copper coins contained 95 per cent. of copper, 3 of tin, 2 of zinc and lead. The 20 para piece weighed 16·36 grammes (253 grs.), but has fallen to 10·693 (165 grs.): value of issue, 17,253,000 piastres.*

'Abd-El-'Azeez followed his brother's example, and issued his coinage in accordance with the figures above quoted. Murád V. coined only the pound or lira, and 'Abd-El-Hameed II. has so far issued only gold and silver.

The silver, copper, and bronze, piastres had originally the same value; but the Turkish Government has reduced all the silver coinage of Maḥmood II.'s reign to half its current value, and declared the silver Mejeedeeyeh to be worth only 19 (instead of 20) ghuroosh.

The relative values of the different Turkish coins have, however, always been in a fluctuating state. A history of these changes would be out of place here, but the following notes from Jevád Bey's chapter on the currency in the first volume of his excellent *Ta-reekh-i-'askaree-i-'Othmanee*,† which are also mainly stated by M. Belin, may be found useful:—

Seleem I.—Seleem II. Kará-ghuroosh = 40 akchehs; Sultánee = 50 akchehs; Hungarian gold pieces = 60 akchehs, or 2 florins, 15 kreutzers. Akcheh = rather more than 2 kreutzers.

Murád III. 800 and 1000 *a* (instead of 400) made

* These statistics I owe to the kindness of Dr. E. Dickson and the obliging exertions of M. Hortolan, who extracted some of the materials from the *Récueil des Traités de la porte Ottomane avec les puissances étrangères*, by Baron J. de Testa.

† Mr. Gibb has kindly analyzed the chapter for me. There is a French translation by Georges Macrides.

from drachms of silver. Ghuroosh rose to 50 *a* and altoon to 120 *a*.

Mohammad III. In 1006, the drachm of silver (which was = 5 *a* under Suleymán I. and = 12 *a* under Murád III.) was decreed to = 8 *a*: but without effect; the ghuroosh rose to 80 *a*. Then officers and functionaries were forbidden to use silver trappings and gold lace: but the rate still fell; the altoon rose to 160 *a*, and the ghuroosh to 110 *a*. The merchants were obliged to take silver by weight only. In 1009 a new issue of akchehs brought the altoon down to 120 and the ghuroosh to 80.

Ibráheem I. Altoon = 250 *a*; ghuroosh = 125 *a*: reduced to 160 and 80, by the Grand Vezeer Kemán-Kesh Kará Muṣṭafá Pasha.

Mohammad IV. Base ghurooshes struck in Bosnia, Albania, and Belgrade, to pay the troops, = 118 *a*. In 1065, says Na'eemá, there was not an akcheh in the treasury to pay the army; the ghuroosh (Austrian) was at 80 *a*, the asadee (Dutch) ghuroosh at 70. The money-changers would only accept akchehs at their intrinsic value by weight; and good money had to be given by the Government for the clipped akchehs which had suffered from Jewish shears, and were known as "Gipsy-Akchehs" (Chingáne Akchasi), or "Tavern-Akchehs;" and with this base coin the army was paid, with the well-known result of the "Riot of the Aghas."

Suleymán II. In great stress for warlike expenses, it was decided to coin 800 mánghirs out of an oke of copper, and call two mánghirs equal to one akcheh, and soon the mánghir was declared to be equal to the akcheh. Mánghirs were struck throughout Bosnia and Albania; so that copper pieces became very common, and gold and silver coins very rare. In 1102 the ghuroosh was reckoned at 120 akchehs, and went for 160; the altoon at 270 for 360; the para = 4 akcheh, and the akcheh = the mánghir. The Constantinople altoons were exported, and the "light and debased"

Egyptian, Tunisian, and Algerine pieces supplied their place. (As a matter of fact, the Egyptian and Barbary pieces were neither light nor debased.)

Muṣṭafa II. Ṭughrálee altoon introduced (= 300 akchehs)* to restore the coinage, and old altoons bought up at 100 new altoons per 110 drachms of gold. Mints were at the same time established at Smyrna and Adrianople for the issue of the new coin. Ṭughrálee zolotas were also struck (and the old bought up) at Constantinople, Smyrna, Adrianople, and Erzeroom.

Aḥmad III. Tariff promulgated in 1138:—The new altoon = 400 akchehs; Miṣr Zinjirleesee (cordonné) = 330; the Miṣr Ṭughráleesee = 315; the new (Ṭughrá) ghuroosh = 120; yigirmilik = 60; onlik = 30; while 100 of the *new* akchehs were to go to the new ghuroosh. Foreign coins were to be valued:—Yildiz altoon (Venetian ducat) = 378 akchehs; Austrian (Hungarian) altoon = 360; the 'ateek asadee ghuroosh (old rix-daler) of $8\frac{1}{2}$ drachms = 144; the Soliya riyal = 186; the Kárá-ghuroosh of 9 drachms = 181; the old zolota = 88; etc. In the countries taken from Persia the money was to be struck with the Sultán's name in Ṭughrá and called Sultánee, with the weight of the coins of the 'Abbásees; and the piece weighing 7 dániks should have the value of 16 paras, its half that of 8, and its quarter that of 4; and a new zingirleesee altoon (like the Constantinople one) should be struck of 24 carat pure gold, weight of $\frac{10}{100}$ drachm, and rate of 400 akchehs.

Mahmood I. Base ghurooshes abolished and old paras withdrawn: new akchehs and ghurooshes "of exact standard" issued. Also, the zer mahboob with Ṭughrá was fixed at 110 paras, or 330 akchehs, the Miṣr zingirleesee at 110 paras, the Miṣr Ṭughráleesee at 105 paras, and the ghuroosh at 40 paras.

* The change does not appear on the coins until the succeeding reign.

Muṣṭafa III., 1185. Rate of zer mahboob raised to 120 paras, and the funduk altoon to 160 (from 150).

Abd-El-Hameed I. added alloy to his coins, to meet the expenses of the war with Austria and Russia; coining ikiliks (2 ghuroosh), 3 of which = 150 ghurooshes of to day. Before this, the Yildiz altoon had been at 5 ghuroosh 10 paras; the Hungarian and funduk altoons at 5 ghuroosh; zer mahboobs and Islámbóls at 3 ghuroosh 20 paras; and the riyál at 2 ghuroosh. The yildiz altoon acquired the value of 5 ikiliks on the issue of the new coins; and the others rose in proportion.

Seleem III. War continued, and base coins issued as before, including yuzliks.

Mahmood II. Effort made to reform the coinage: a decree fixed the yildiz altoon at 10 ghuroosh; the Hungarian at 9 gh. 20 p.; the Funduk at 9 gh., quarter Funduk at 2½ gh.; the Constantinople zer mahboob at 6½ gh., half z. m. 3 gh. 10 p.; Egyptian z. m. at 5½ gh., half z. m. at 2 gh. 30 p.; and a decree in 1249 fixed the funduk altoonee, weighing a dirhem, at 23 ghuroosh. The following table summarizes some of the varieties in the akcheh.

A.H.			
900—935	Yildiz altoon	=	60 akchehs.
1003	...	=	120
1006	...	=	160
1050	...	=	350
1101	...	=	400

A few words are necessary on the provincial coinage.

In a footnote on p. xviii it has been shown that the mints of Syria and Mesopotamia issued coins of a heavier weight than the mints of Europe, during the period when the akcheh was the only silver coin struck at Constantinople. After the introduction of the New Coinage, these Asiatic mints continued to strike coins of a peculiar style and weight, many resembling those issued before the reform.

E.g. Suleymán II., Baghdád 43·5 grains; Ahmad III., Tiftees, 82, Eriván 85, Kenjeh 82, Tebreez 79, 36, 82; Mahmood I., Kenjeh, 42, Tiftees 84; 'Abd-El-Hameed I., Baghdád, 68, 33; etc. These are clearly of two classes, the one weighing from 68 to 85 grains, the other about half of this, or 33 to 43. I have termed these onliks and beshliks in the Catalogue, since they correspond fairly closely to the weights of these denominations in the Constantinople currency; but I have little doubt that the 40 grain piece was a survival of the old Seljookee dirhem, which weighed about 45 grains; and the 80 grain piece was a double dirhem. The people of Asia Minor apparently did not take kindly to the new system of the 'Othmánlees, but preferred to retain the old Mohammedan currency. Jevád Beg, it should be observed, mentions the dirhem of Ámid as something peculiar. The coinage of the Barbary States is also noteworthy: we find such weights as Tripoli 22 grs.; Tunis 88, 90, 77, 92, 18, 16, 15; etc.; which point to a different principle of coining from the Constantinopolitan: and the gold coinage is also somewhat anomalous in weight (*e.g.* Tunis 24, 20, 16; Algiers 27, 26, 13), but was probably only a corrupt and debased form of the ordinary currency, with which it often tallies accurately.

The coinage of the 'Othmánlee Sultáns is so uniform and unvarying in its inscriptions that very few coins call for special remark. Among these few, however, must certainly be included the curious Muwahhid-like piece (no. 256) struck at Tilimsán in 988 (?) with the unique inscription صاحب العادل (?) المستقيم السلطان مراد ابن السلطان سليم مالك البرين والبحرين والشام والعراقين خلد الله ملكه, and the obscure sequin (no. 365) struck at (perhaps) Fez (miswritten فس?) in 1056. Both these cities were outside the limits of the Turkish empire; but they could claim the Sultán's protection by inscribing his name on the coinage. No. 306, struck at Constantine in Algiers,

bears also a curious look, and does not resemble the ordinary Turkish issues; but it may have been struck in haste and confusion, for its date 1253 A.H. (1837) indicates the last few months of Turkish rule in Algiers. Constantine was taken by the French in 1837; it was defended by Aḥmad Bey on behalf of the Porte, and was the last place held by Turkey in Algiers. The small Hijáz gold coins struck by Suleymán I. also deserve notice, both for their trifling weight and the unusual character of their inscriptions (nos. 209—214).

Of coins of provincial governors (omitting the uncertain specimens of 102 *a*, and 110), the only examples bearing names are those of the famous rebel 'Alee Bey of Egypt (pp. 204, 205); some copper pieces of Sa'eed Páshá of Baghdád (286), who, however, was not a rebel; and the issues of the last Bey of Tunis, Moḥammad, as vassal of the Porte (pp. 330 ff.). None of these offer any very special points of interest; though 'Alee Bey's silver coins are the first examples of the ghuroosh and yigirmilik in Egypt.

The coinage of Constantinople and other mints offers during the twelfth century of the Flight a variety of initial letters, placed generally over the word ابن in Formula B, on obv., or above ضرب or beside the date on the rev., which may be assumed to represent some official's name. The following table includes all these letters as observed in the National Collection. They do not begin until some few years after the New Coinage was established.

SULTÁN.	MINT.	DATE. A.H.	LETTERS.
Aḥmad III.	Constantinople	1115	ص, س, را, ر, د, ح, ب ه, عد, ی, ه, ق, ص
...	Islámból		مد, (?), ص, ق, ر, د
...	"	1123	ع
...	Tifleez	1115	ح
...	Kenjeh	"	م

SULTÁN.	MINT.	DATE.	LETTERS.
		A.H.	
Aḥmad III.	Tebreez	1115	ی
...	Egypt	„	ص
Mahmood I.	Constantinople	1143	ق, عب, عا, ع, ص, را
...	Islámból	„	م, م, عب, ع, ص
...	Egypt	„	راعب, (with را) د, ص (with یا) ع, س, ص ن, (?) م, عبد
'Othmán III.	Constantinople	1168	ص, با, ح
...	Islámból	„	با
...	Egypt	„	(ع with) ص, س

In the reign of the succeeding Sultán Muṣṭafá III. (1171) the letters disappear, and their places are thenceforward filled by cyphers indicating the year of the Sultán's reign; and the only coins with letters of this kind after 'Othmán III. are those of 'Alee Bey of Egypt, which carry عا; and some Egyptian coins of Seleem III.'s time, which bear اس, standing doubtless for Ismá'eel Bey, who was left as governor of Egypt by Ḥasan, the Capitan-Páshá, after the expedition against Ibráheem and Murád Beys, and who died of the great plague in Cairo in 1205 (1791). In a similar manner, M. Bernard tells us that Napoléon Bonaparte marked the coins he struck while in possession of Egypt with the letter ب; but I have not met with numismatic proof of this. The instances of 'Alee and Ismá'eel Beys would seem to show that these letters on Turkish coins from Aḥmad III. to 'Othmán III. represent the names of governors, grandvezeers, or mintmasters. The fact that so many different letters occur on coins of the same date does not militate against this theory, for that date is merely the year of accession of the Sultán, the only chronological attribution supplied on the majority of 'Othmánlee coins from Bayazeed II. to 'Othmán III., until (as has been mentioned), the year of the reign was added in the time of Muṣṭafá III. The coins, *e.g.* of Aḥmad III., bear

the year of accession 1115, but may have been struck any time between then and the end of his reign, in 1143. The initials on the coins, however, do not coincide with the names of any of the high officials given in Von Hammer's lists, and unfortunately the list of the officials termed "*Sarabchane Emini*, der Intendent der kaiserlichen Münze, auch *Sidschije Emini* genannt"* cannot be obtained. There is little doubt, I think, that if we possessed the list of these mint-superintendants we should find the explanation of the initials on the coins.

The Medals which conclude the volume are chiefly decorations for well-known campaigns; but the pieces struck to commemorate the New Coinage, the Restoration of St. Sophia, and the revised monetary standard are rare and curious.

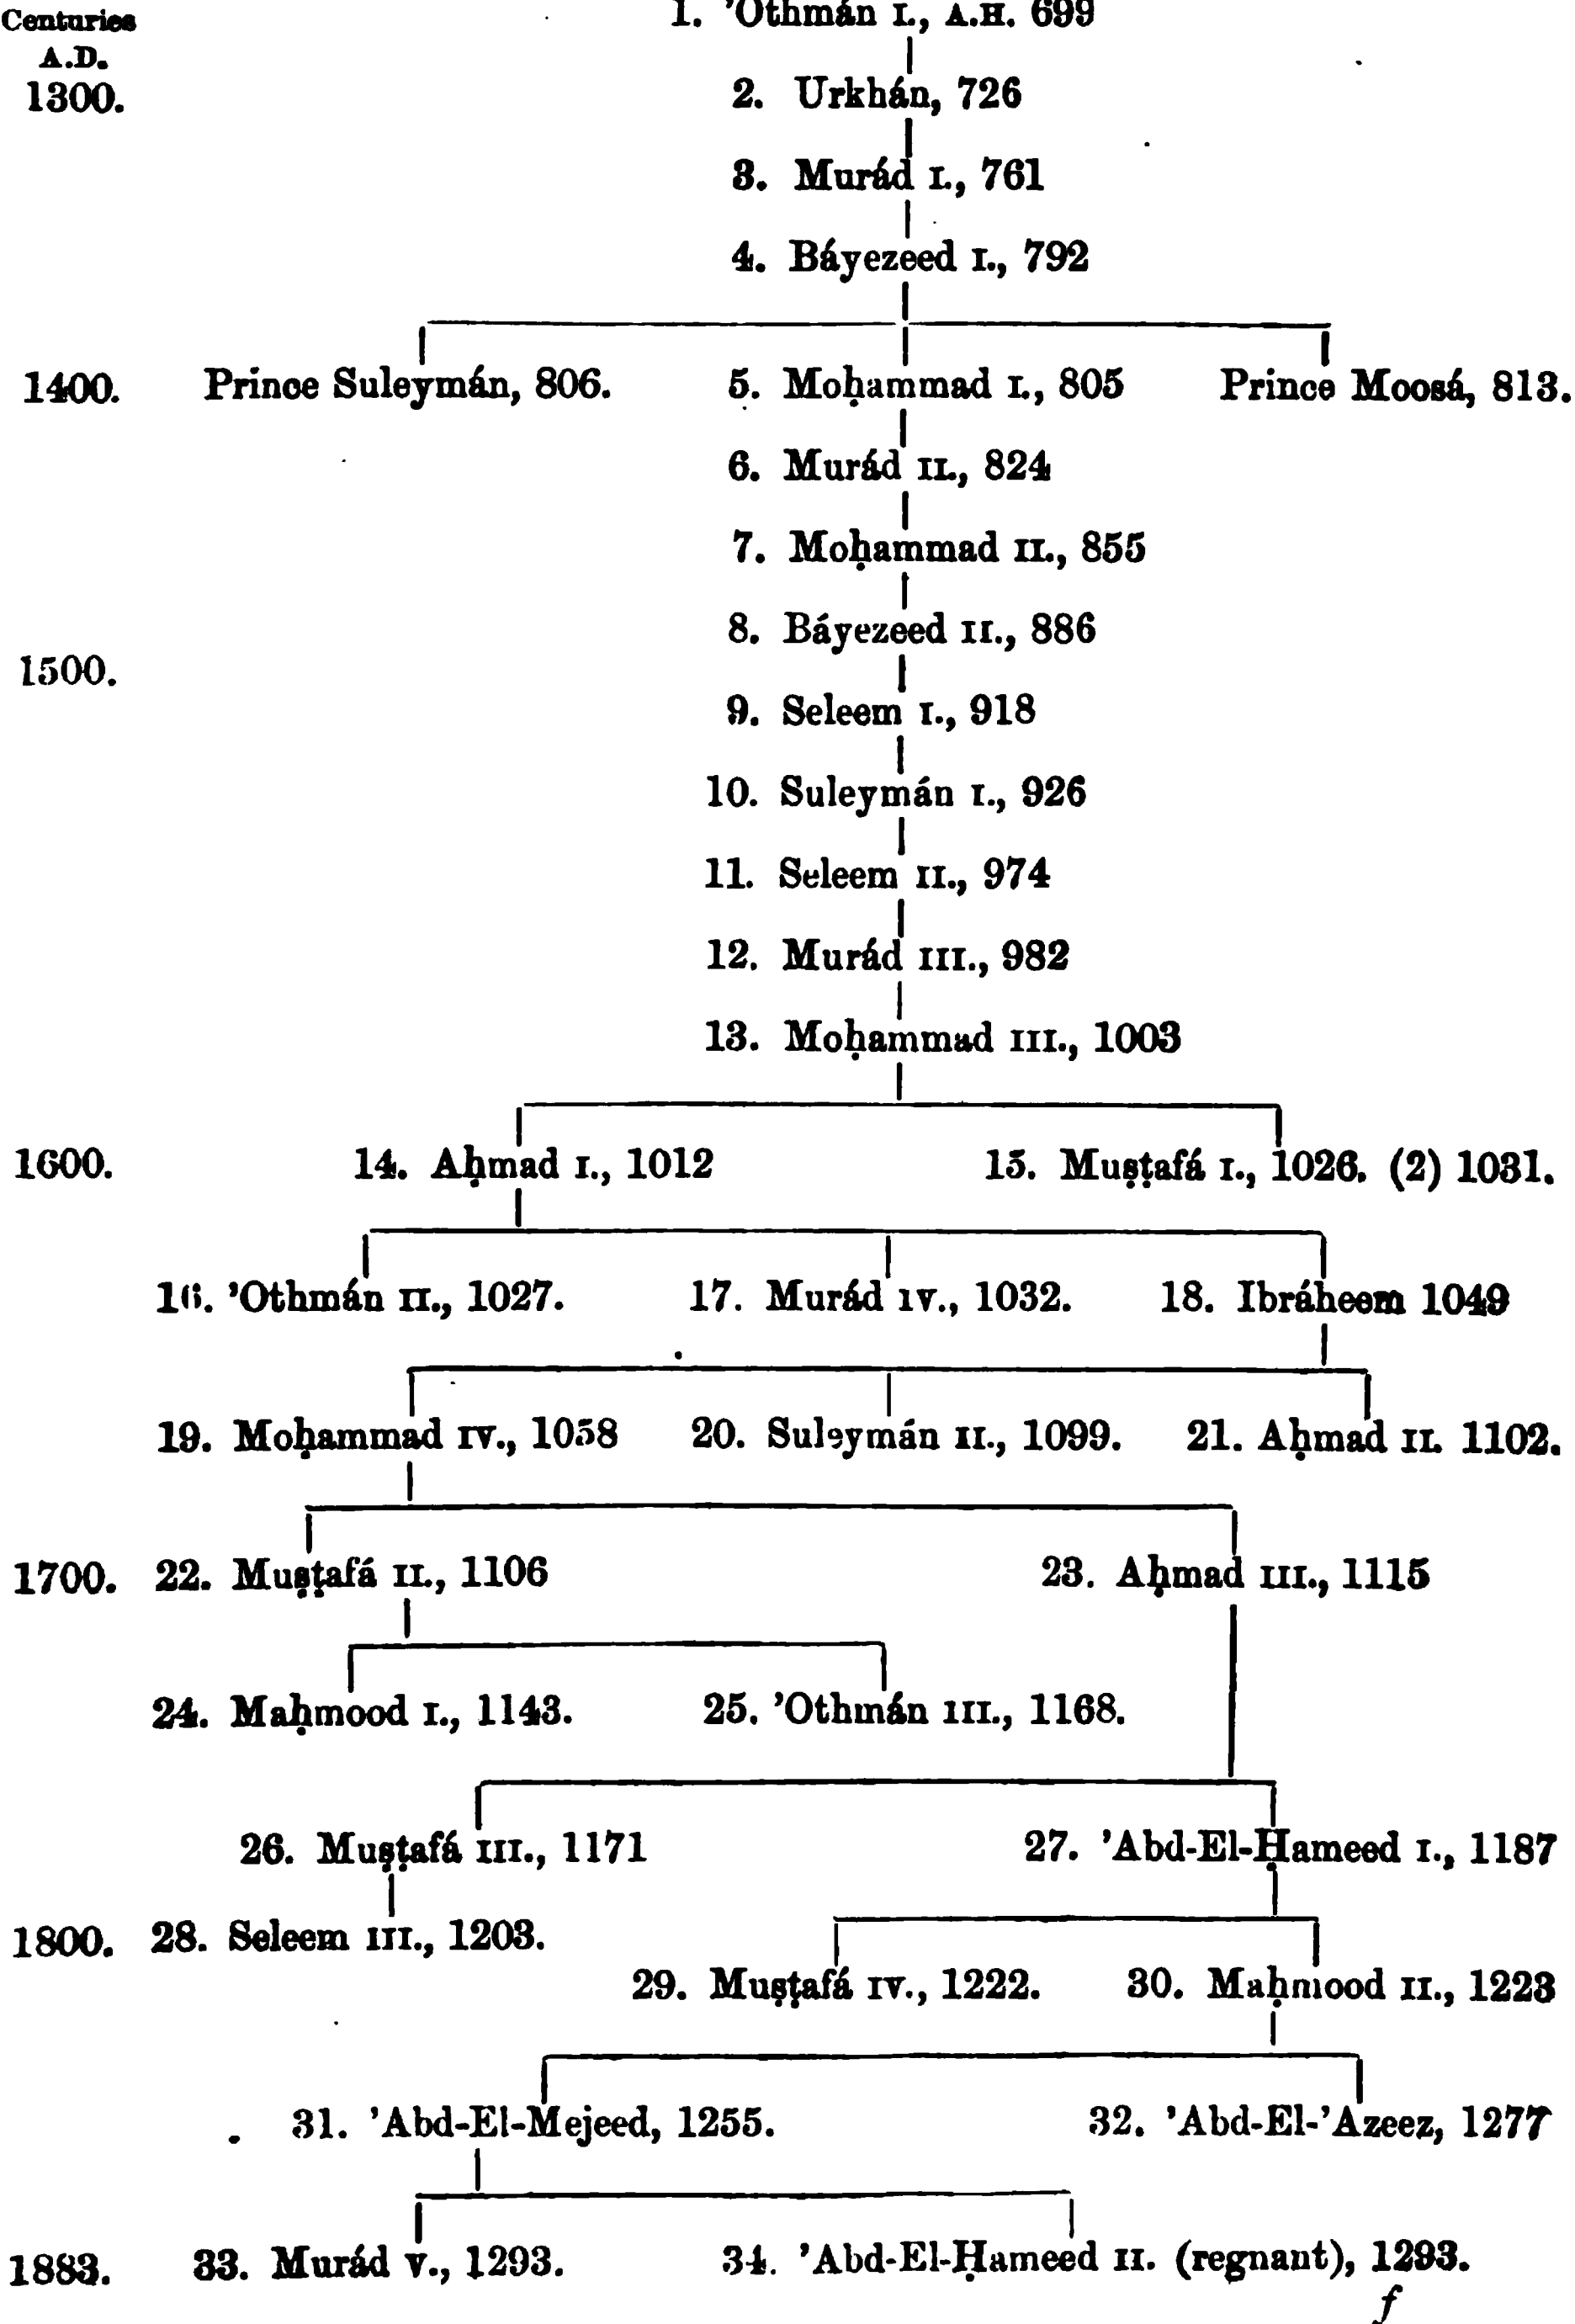

In conclusion, I am glad to take this opportunity of thanking Dr. E. Dickson, of the British Embassy, Constantinople, for the great trouble he has so kindly taken in clearing up difficulties involved in the present work. To Mr. E. J. W. Gibb, of Lochwood, Lanarkshire, I am deeply indebted for a variety of important information derived from original Turkish authorities, as also for the table of the growth of the Ottoman Empire. M. H. Sauvaire, M. Tiesenhausen, Dr. J. G. Stickel, Mr. Redhouse, Mr. Grueber, Mr. Keary, Subhi Pasha, Ahmad Vefik Pasha, Rogers Bey, and M. Hortolan have also given me their valuable assistance on various matters connected with this work.

STANLEY LANE-POOLE.

Very obscure.

*Pierced. R* 7, Wt. 17·5

---

* The obscure word, written عا and عا, may be either عثمان or عبد الله. In the former case (which I think the more probable) بن must be supplied ; but most of the words on the coins of Urkhân are so inaccurately and incompletely written that there is nothing remarkable in the omission of بن. On these coins, عا is generally written without the ن, and السلطان is expressed by three or four upright strokes. Such barbarous engraving is not reproduced in the descriptions, since no object would be gained by its representation, when there is no doubt of the correct reading. Whenever any ambiguity is possible, the actual lines of the inscription are carefully reproduced, as in the case of عا. Marsden's reading of this word as هازى seems far-fetched.

The following extract from Sir EDWARD CREASY'S *History of the Ottoman Turks* (1877 ed., p. 521 ff.) will explain the circumstances under which Medals V.-VIII. were awarded:—

“Mehemet Ali had resolved on founding an hereditary dominion on the ruins of the apparently doomed empire of the Sultan. He had restored his navy after its destruction at Navarino; he possessed a veteran and admirably-disciplined army, chiefly officered by Frenchmen; and, above all, he had a general of science, experience, prudence, and energy in his son, the celebrated Ibrahim Pacha. He had obtained the Pachalic of Crete from the Porte, but had been refused that of Syria. He determined to take it by force. A personal quarrel with the Pacha of Acre gave him a pretext for attacking that officer. The command of the Sultan that this civil war between his servants should cease was contemptuously disregarded; and Ibrahim Pacha besieged Acre with an army of 4000 men, and a fleet of five ships of the line and several frigates. The key of Syria was captured by him on the 27th of May, 1832, and for several years Mehemet Ali was the real sovereign of that important country. The disaffected armies of raw recruits, badly officered, and worse generalled, which the Sultan sent against the rebel Egyptian Chief, were beaten by Ibrahim in three great battles—at Ems, in Upper Syria, on July 6th, 1832; at Beylon (in Cilicia, near the ancient battle-field of Issus), 1832, on the 29th of the same month; and at Konieh, in Asia Minor, on the 29th of October. The position of these places indicates the rapid progress and bold designs of the Egyptian commander, who seemed to annex Asia Minor to Mehemet's dominions with the same ease as Syria, and whose advance upon Constantinople in the coming spring appeared to be inevitable and irresistible. In this agony of his House and Empire the Sultan sought aid first from England, but none unhappily was accorded. Russia was watching eagerly for the opportunity which English folly thus threw in her way. Her troops and her transports, and her ships of war, were ready at Sebastopol and Odessa; and when, at last, Mehemet humbled himself to express to his ancient enemy a wish for a protecting force, prompt messengers were despatched to the great Crimean

depôt of Muscovite power, and a Russian squadron of four ships of the line set sail from Sebastopol and landed 6000 of the Emperor's troops near the mouth of the Bosphorus on February the 20th, 1833.

"Meanwhile, the forward march of Ibrahim had been temporarily stayed by a messenger from Admiral Roussin, whom the French Government had sent with a fleet to aid the Sultan. A negotiation was entered into, but broken off after a few days, and in the beginning of March Ibrahim again pointed his columns towards the Bosphorus. But a second Russian armament from Odessa now had reached those straits, and, on the 5th of April, 12,000 soldiers of the Czar Nicholas were encamped on the Giant's Mountain, near Scutari. Ibrahim felt that any future advance on his part would be madness; and occupied himself in procuring the largest possible increase to his father's power in the negotiations that followed, in which England and France (now thoroughly alarmed at the advantage gained by Russia) took part with anxious zeal. The terms of compulsory reconciliation between the Sultan and the over-powerful vassal were embodied in a Firman of May the 6th, 1833, by which the Porte confirmed Mehemet Ali in his government of Crete and Egypt, and added to them those of Jerusalem, Tripoli, Aleppo, Damascus, and Adana."

“This medal was bestowed by the Sultan upon the English naval forces engaged in the war in Syria, 1840; in gold to officers ranking with field-officers; in silver to quarter-deck and warrant-officers; and in copper to petty officers, seamen, marines, and boys.” \*

The Treaty of July 15th, 1840, between Turkey, England, Russia, Austria, and Prussia, defined the terms on which the disputes between the Sultan and Moḥammad 'Alee were to be settled. “Mehemet Ali (who probably expected aid from France) refused for some time the requisitions of Turkey and the four Powers; and an English fleet, under Admirals Stopford and Napier, proceeded to wrest from him his stronghold on the Syrian coast. Beyrout was bombarded on the 29th of August, 1840, its Egyptian garrison was expelled, and the Turkish troops, which had been conveyed on board the English fleet, took possession of the ruins in the Sultan's name. By a still more splendid achievement in the British Navy, Acre was bombarded and captured on the 3rd of November. The other Syrian fortresses fell rapidly; and, aided by the British seamen and marines, and also by the native populations (which had found Egyptian bondage far more grievous than the old Turkish rule), the Sultan's forces were, by the close of November, completely masters of Syria.” †

\* This date belongs to the next reign. Perhaps the change of sovereigns had not reached Tunis.

† Henceforward, most of the coins bear the date of accession and the year of the reign. The latter is given in the second column, and the resulting date (which does not appear in this form on the coins) in the first column : when there is no year of reign, however, the date in the first column alone appears on the coins.
